Subject: HOT Private Drinking water Samplers Bac-T sampling- private water wells

Troy,

EPA Region 6 would like to discuss with CDC issues revolving around private drinking water well sampling. Specifically if EPA under ESF-10 should be collecting bac-T? Or should this be completed through a FEMA mission assignment under ESF-8 and HHS? EPA is also needing State Health Authorities and CDC recommendation and advise on what to actually test for when private wells are impacted from flood water. Can you please reach out to Taim ASAP. He left you a voice message.

Respectfully,

CAPT Patrick Young, RS, MS

Subject: [SPAM] EPA and Texas Contacts

CAPT,

I am writing to let you know that I am in Dallas supporting the Hurricane Harvey response as a CDC water quality and environmental health subject matter expert. CDC is especially aware of the fact that EPA has authority over public water supplies. Please let me know if there is anything I can do to

ensure smooth coordination with your office. I would also appreciate any assistance you can provide with helping me to build contacts with local EPA, water utility and health department officials.

Regards,

Troy Ritter, PhD, REHS, DAAS
